MBUS 554 – Management Risk Analysis with Computer Simulations (3)
Prerequisite: BPST 316 or equivalent. Students research how computer simulations are used for risk management in today’s technology business environment. Computer simulation methodology and how it applies to risk management methodology is presented. Students are expected to execute several existing risk simulation models. Results from these models are used to rank identified risks, design and develop appropriate risk management strategies, and assess the overall effects on an organization. | MMIS 554 – Management Risk Analysis (3)
Prerequisite: MATH 200 or equivalent and MMIS 500 or equivalent. Students research how computer simulations are used for risk management in today’s technology business environment. Computer simulation methodology and how it applies to risk management methodology is presented. Students are expected to execute several existing risk simulation models. Results from these models are used to rank identified risks, design and develop appropriate risk management strategies, and assess the overall effects on an organization. (Credit is not granted for both MMIS 554 and MBUS 554)

JUSTIFICATION (including impact on majors, minors, concentrations, and general education courses within the University curriculum; attach additional pages if required)
The revised MBA program does not include the MBUS 554 course. Therefore, changing the prefix from MBUS to MMIS puts the course under the jurisdiction of the MSMIS program.

BPST 316 is a BPS course. Because the BPS program is now in a teach-out, changing the prerequisite to MATH 200 keeps that prerequisite requirement the same because MATH 200 is currently recognized as an equivalent course for BPST 316.

MMIS 500 will provide students with the appropriate management information systems background needed for this course.

TRANSITION PLAN (describe how will students who are in Catalogs where the course is required for a major be accommodated; attach additional pages if required)
MATH 200 is an equivalent course for BPST 316 and the proposed prerequisite course, MMIS 500, is a required core course in the current MSMIS degree program. Therefore, current students should not be impacted.

Approvals
Department Chair: Ken Machande
Date: 11/7/12
Expedited course changes are posted for a 10-class day comment period. If no comments are raised during that time, the proposal becomes final. All expedited proposals approved in this way will be noted on the UCC web site.

If comments are raised, the proposal may be reviewed by the UCC and then approved or it may be returned to the CCC for additional deliberation (as required).
