Proposed Catalog Entry  
Prerequisites: BIOL 126 or 132; (C- or better in each course). The anatomy of selected Chordates with special emphasis on the Vertebrates. Lecture also examines the evolution of the organ systems of vertebrates. Laboratory.

JUSTIFICATION (including impact on majors, minors, concentrations, and general education courses within the University curriculum; attach additional pages if required). Any change that impacts another Department must have a written statement (such as a copy of an email) from the Chair(s) agreeing to the change.

The Department of Biological Sciences has submitted a proposal to allow students to count both 301 and 384 toward the biology major. If this proposal is approved, the course description for BIOL 301 must be changed to accurately reflect the new policy. “Students may not count both 301 and 384 toward the major” must be removed so that the course description for BIOL 301 in the Academic Catalog is consistent with academic policy governing the biology major.

TRANSITION PLAN (describe how will students who are in Catalogs where the course is required for a major be accommodated; attach additional pages if required)

No transition plan is necessary since these courses are electives in the major.
