Because our department now has two semesters of introductory courses for environmental sciences, EESC 110 and 120 after years of only having one course to cover all the concepts, all of the content involving energy has been moved to EESC 120. These are the concepts required for EESC 355.

TRANSITION PLAN (describe how will students who are in Catalogs where the course is required for a major be accommodated; attach additional pages if required)

Not a required course.
