Fixing hyperlinks in Canvas announcements

Click to place your cursor on top of one of the hyperlinks. Then the two buttons at the top will allow you to change the hyperlink. The button on the right simply removes the hyperlink completely. This might be a good option if you want to remove the messed up link completely and type in the text of the correct web address right into the announcement (rather than having a hyperlink). The image on the left will open up a window allow you to edit the hyperlink. So this is one way you could embed the hyperlink yourself. Simply click the button on the left, delete the messed up address coming from webmail, and enter the corrected address into the address box.
