Pecha Kucha

What is it:
- In general, it is a presentation that consists of 20 images. Each image is shown for 20 seconds, making it an almost 7 minute presentation.

General tips:
- Use high quality images since the presentation is solely based on images
- Pay attention to the order of the slides. It should make sense and be easy to understand whether it's ordered chronologically, or in some creative way
- Images should be relevant to presentation topic
- Use helpful images, not distracting ones
- Practice the timing a lot to ensure you have it down. Otherwise, you will not follow the pecha kucha rules, or will have awkward pauses waiting for 20 seconds to pass or not having enough time
- You should still follow traditional presentation guidelines. Essentially, although it is a unique presentation, you should still have an introduction, body, conclusion and follow other basic presentation guidelines
